ROYAL PARKS
DANGER
NO ENTRY
FIREARMS IN USE

Mr Javid

Dear ~~Ms Miller~~,

Please implement a programme of wildlife contraception in the Royal Parks for the deer in place of culling. This method of deer management is already successful in two US states, New Jersey and Maryland, so we would like it licensed and used in the UK now. The cull is cruel and unnecessary, and also causes a huge amount of stress and terror to the surviving animals. There are humane alternatives and no good reason not to find a way to control deer numbers without killing. I look forward to your response.

Yours sincerely,
name:
